**DETAILED ACTION**

1. Claims 2-4, 7-15, 17-28, 30-32, 34-38, 40-57, and 59-61 have been presented for examination.

Claims 1, 5-6, 16, 29, 33, 39, 58, and 62-63 have been cancelled.

**Allowable Subject Matter**

2. The following is an examiner's statement of reasons for allowance: claims 2-4, 7-15, 17-28, 30-32, 34-38, 40-57, and 59-61 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims, specifically:

**EXAMINER NOTE: Claim 60 is CURRENTLY AMENDED yet recited in the claims as PREVIOUSLY PRESENTED. The Examiner will proceed under the assumption that the claim is intended to be amended as per the amendments submitted 4 January 2010.**

The recitation with respect to claims 2 and 30 of:

wherein the plant simulation program comprises Boolean algorithms including variables, and wherein the variables are defined to represent control signals of different state and operating conditions of the plurality of operating units as well as command signals for commutating and maintaining the different state and operating conditions of the plurality of operating units.

in combination with the

remaining limitations of claims 2 and 30.

The recitation with respect to claim 59 of:

further comprising a first program for simulating a relay operation and a second program for simulating a relay network operation,

and

further comprising graphic programs for representing relays associated to the first program for simulating relay operation and to the second program for simulating relay network operation,

wherein an operation of the logical engine is further represented as an equivalent command hardware logic comprising a relay network.

Art Unit: 2128

The recitation with respect to claim 60 of:

wherein the additional program and the plant simulation software each comprise a Boolean equation system, and

~~wherein further composing the steps of:~~

~~comparing the additional program and the plant simulation software are compared by comparing one or more of the Boolean equation systems of the additional program and of the plant simulation software, or results of simulating tests executed with the additional program and the plant simulation software, and~~

~~verifying that the additional program and the plant simulation software produce identical results.~~

The recitation with respect to claim 61 of:

further comprising the step of scheduling and configuring images and state and command variables of virtual operating units corresponding to desired operational and state conditions of the plant and a predetermined situation of operation, and the step of executing a visual check of correct operation and an automatic check based on comparing a nominal

and

image and a nominal list of desired state and command variables, and the image and state and command variables really processed during the operation of the logical engine, an error message being sent ~~in case of non-identity between~~ when the nominal image and the nominal list of the desired state and command variables ~~and are not the same as~~ the image and state and command variables really processed during the operation of the logical engine.

The claims are rendered statutory since claim 2 recites a device with at least a CPU as hardware, claim 30 recites a method with corresponding hardware such as at least a CPU, claim 59 recites a device with corresponding hardware such as at least a computer, claim 60 recites a method with corresponding hardware such as at least a CPU, and claim 61 recites a method with corresponding hardware such as at least a CPU. See Figure 1.

Art Unit: 2128

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
